

Ideation Phase

Define the Problem Statements

Date: 28.09.2026

Team ID: SWTID-2026-4282

Project Name: Streamlining IT Procurement (Flow Designer)

Maximum Marks: 2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face.

Problem Statement	I am <i>(Customer)</i>	I'm trying to <i>(Outcome/Job)</i>	But <i>(Barrier)</i>	Because <i>(Root Cause)</i>	Which makes me feel <i>(Emotion)</i>
PS-1 (Employee Perspective)	An enterprise employee who needs a standard laptop upgrade to perform daily job duties.	Order a standard corporate laptop quickly through the service portal to remain productive.	The approval and delivery process takes several weeks with zero tracking status visibility.	The current procurement workflow is entirely manual, relying on back-and-forth emails between managers and vendors.	Frustrated, ignored, and unproductive due to tech downtime.
PS-2 (IT Specialist Perspective)	An IT Procurement Specialist managing hardware fulfillment requests for the organization.	Process and fulfill standard laptop orders efficiently to meet business onboarding timelines.	I am completely overwhelmed by routine administrative tasks and manual data entries.	We lack automation infrastructure like Flow Designer to trigger instant approvals or direct supplier API orders.	Stressed, overworked, and inefficient from repetitive paperwork.
