

Ideation Phase: Brainstorm & Idea Prioritization Template

Date: 28 September 2026	Maximum Marks: 4 Marks
Team ID: SWTID-2026-4282	Project Name: Streamlining IT Procurement

Focus Topic: Streamlining IT procurement by automating standard laptop orders using ServiceNow Flow Designer. Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon to shape an automated catalog request fulfillment path.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

PROBLEM STATEMENT:
How might we use ServiceNow Flow Designer to automate standard laptop orders so that manual procurement cycle times, vendor communication overheads, and inventory delays are minimized?

Step-2: Brainstorm, Idea Listing and Grouping

The following ideas were generated and categorized into specific theme clusters by the team :

Theme Cluster	Brainstormed Sticky Notes / Ideas
1. Automated Approvals & Rules	• Auto-approve orders if within departmental budget bounds. • Multi-tier dynamic approvals via Flow Designer for executive upgrades. • Manager auto-approvals triggered instantly via Slack/Teams integration buttons.
2. Vendor & API Integrations	• Flow Designer integration speaks to external vendor APIs (Dell/Lenovo) for real-time stock verification. • Automated PO (Purchase Order) PDF generation and emailing directly to suppliers upon approval. • Real-time shipping status webhook updates pushed directly back into the ServiceNow asset record.
3. Inventory & Asset Management	• Automatic buffer-stock replenishment triggers when inventory falls below 10 units. • Pre-allocating serial numbers in the CMDB directly from the flow run stage. • Automated assignment tasks sent to local IT technicians for imaging/staging.

4. User Experience & Notifications	- Self-service order tracking dashboard built via Service Portal showing live progress visual bars. - Interactive SMS updates via Twilio Integration Spoke at shipping milestones. - Single-click 'Confirm Receipt' button sent to the user upon courier delivery tracking confirmation.
------------------------------------	--

Step-3: Idea Prioritization Matrix

Ideas mapped to a matrix grid evaluating their ****Strategic Importance**** (business value, impact) against ****Feasibility**** (implementation cost, speed, Flow Designer complexity):

Feasibility Importance	HIGH FEASIBILITY (Low complexity, Native ServiceNow spokes)	LOW FEASIBILITY (High custom dev, Third-party complex APIs)
HIGH IMPORTANCE (Massive time/cost savings)	■ Quick Wins (Do First): - Manager auto-approval rules. - Service Portal progress dashboard. - Asset staging tasks for local IT technicians.	■ Strategic Initiatives (Plan Out): - Direct API integration to vendor catalogs (Dell/Lenovo). - Automatic PO generation & vendor dispatch integration workflow.
LOW IMPORTANCE (Nice-to-have features)	■ Fill-ins (Low Priority): - Slack/Teams approval interactive action cards. - Low buffer-stock automatic alerts.	■ Thankless Tasks (Reconsider): - Twilio SMS tracking notifications (redundant if email/portal exists). - Pre-allocating serial numbers before arrival.
